Distributor:

Exclusive line of
lavatory inventory
in brushed stainless
steel.

N. SAABY JØRGENSEN DAN DRYER A/S

Company profile

In 1972, Niels Saaby Jørgensen set up a trading company, purchasing and selling resource-saving hygiene products – the main category being warm-air hand dryers.

After a number of years, he started to develop a quality hand dryer of his own. His intention was to manufacture a hand dryer which would comply with all existing as well as future standards in respect of safety, functionality and durability. Although the dryer should boast a long and problem-free life cycle, at least 90% of the product should be made from recyclable materials. In 1980, the very first DAN DRYER® hand dryer was manufactured, and since then this top quality product has been a market leader.

In the year 2000, Niels Saaby Jørgensen launched another innovative product, the DAN DRYER® baby changing table. Yet again a product developed in recognition of the fact that the standard of current products in the market could do with a lift quality-wise. The DAN DRYER® baby changing table is constructed with a unique carrying capacity of more than 400 kg, and the table thus easily withstands the rough treatment that public lavatory inventory is regrettably often subjected to.

And now Niels Saaby Jørgensen has done it again! – With the wide selection of products in the DAN DRYER® STAINLESS DESIGN series, he has once more distinguished himself as a pioneer when it comes to combining the demand for quality and functional excellence with unerring aesthetics!

The DAN DRYER® STAINLESS DESIGN series is a complete range of fashionable quality products for elegant furnishing of lavatories with inventory uniformly designed in stainless steel.

The main products of the series are the well-known DAN DRYER® hand dryers types AE and MINI. Both models are touch-free for maximum hygiene and user-friendliness. The machines are constructed of the same quality components as always – but the dryers are now presented in an elegant, easy-to-clean housing in brushed, stainless steel.

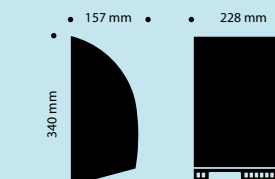

Hand dryer type MINI

The DAN DRYER® MINI hand dryer is a compact, little model ideal for places with few visitors. The output of the MINI dryer is slightly lower than that of type AE – but the machine still offers the same advantages as big brother AE and is all in all the epitome of good hand hygiene!

3-year guarantee!

Technical details

Net weight	6 kg
Connections	230 V, 50 Hz
Output	1800 W
EAN no.	5-709818-002811

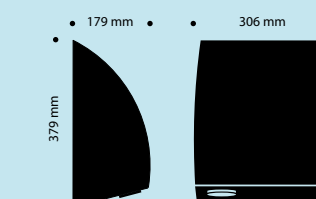

Hand dryer type AE

The DAN DRYER® AE hand dryer has been in production since 1980 and is the cornerstone of this exclusive product line. The machine is known and cherished for its unsurpassed reliability and durability. – A life cycle of 15-20 years is not uncommon. The choice of an AE dryer guarantees efficient, comfortable and hygienic hand drying – and is at the same time by far the most cost-saving and environment-friendly solution – compared to paper and linen!

5-year guarantee!
– even in cases of vandalism!

Technical details

Net weight	7.75 kg
Connections	230 V, 50 Hz
Output	2360 W
EAN no.	5-709818-002804

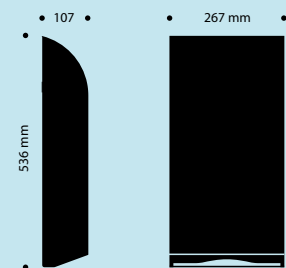

Paper towel dispenser

If the availability of more than one hand drying option is a priority, the STAINLESS DESIGN range offers a most capacious paper towel dispenser. The dispenser holds as many as 3 standard packs of two-ply paper towels, making the need for refilling less frequent. A smart feature provides a slight shearing of the towels to facilitate individual pull-out.

Technical details

Net weight 5 kg
Capacity Approx. 400 2-ply
EAN no. 5-709818-002866

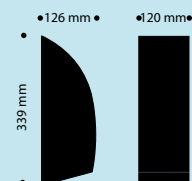

Soap dispenser

The touch-free soap dispenser is automatically ready for dosage upon insertion of 3 pcs. 1.5 V Alkaline batteries type C. Battery life is approx. 1 year or 10,000 dosages. For soap dosage, simply hold hands underneath the dosage nozzle. The unit will dispense once – and once only – when hands are held approx. 5 cm underneath the nozzle. The mechanism is most reliable and ensures a long product life.

Technical details

Net weight 2.5 kg
Capacity 0.95 l
EAN no. 5-709818-002828

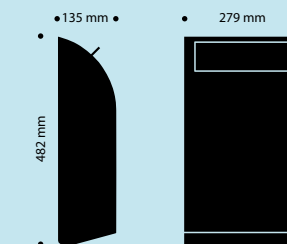

Ladies' bin

The elegant ladies' bin is intended for wall-mounting and designed with a hygienic tip-up lid to ensure that the contents of the bin remain out of sight for the user at all times. The bin comes with an all-welded inner bucket, also in stainless steel.

Technical details

Net weight 7 kg
Capacity 7 l
EAN no. 5-709818-002835

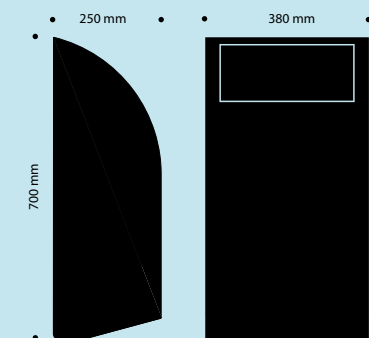

Waste bin

As is the case with the ladies' bin, the large waste bin is designed for wall mounting, which facilitates floor washing and prevents theft. Bags are easily emptied and fitted in the all-weld stainless steel inner bucket once the bin has been opened with the special key supplied.

Technical details

Net weight 17.2 kg
Capacity 30 l
EAN no. 5-709818-002842

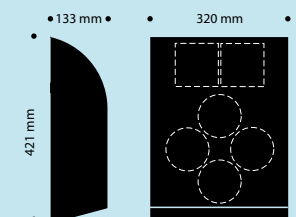

Toilet roll holder - standard

The series furthermore comprises a sophisticated toilet roll holder for 4 standard rolls. The rolls are placed onto a vertical, rotating plate, and when one roll is empty, the next one automatically falls in place. The device ensures economical paper consumption, as staff members refilling the holder can leave rolls that are still half full and merely replace empty ones. Empty rolls stay inside the holder, which prevents people from throwing these into the toilet, causing the drain to clog up.

A small shelf at the top of the rear plate holds two toilet rolls in reserve.

Technical details

Net weight	6.7 kg
Capacity	4 rolls + 2 in reserve
EAN no.	5-709818-002859

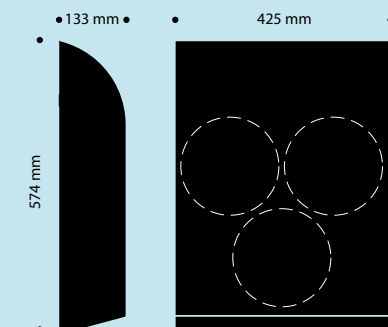

Toilet roll holder – mid-size

Application of mid-size toilet rolls is also an option. As is the case with standard rolls, rolls are placed on a vertical, rotating plate, and the heavier roll falls to the bottom. The dispenser holds 3 mid-size rolls.

The mid-size roll system accommodates users who prefer large rolls; but as opposed to jumbo roll devices, the 3-roll mid-size system boasts the cost-saving advantage that each roll is used up completely.

Technical details

Net weight	9.9 kg
Capacity	3 rolls
EAN no.	5-709818-002873
